**TECHNICAL & SPECIFICATION SERVICE**

For full application details or technical and health & safety information, please read the relevant product data sheets which are available from our sales office and are downloadable from our website www.coo-var.co.uk. The Coo-Var Technical Services Department can provide a wide range of services, information and back-up to support our customers and end users. To arrange for a site visit and specification, please contact us.
ESSENTIAL PROBLEM SOLVING SOLUTIONS FROM COO-VAR

For Wood

**Penetrating Wood Primer**
A high quality oil based primer which penetrates deep into the substrate. This helps to seal the surface and resist moisture. Suitable for all soft woods.
- Suitable for interior and exterior use.

If you have ever heard the saying ‘its all in the preparation’ then you will know the importance of a good primer.

Coo-Var have over 100 years experience manufacturing specialist paints, including a wide range of primers for most applications. We have water based and oil based varieties, and with primers suitable for interior and exterior use, you can be confident there is one for your job. These high quality products will help your paintwork brave the storms and stand the test of time.

This brochure takes you through Coo-Var’s range of primers, which applications they are suitable for, their benefits and their technical information (back page).

At any point in your decision or even after the coating is applied, you can call Coo-Var Technical Services to get advice and to answer any questions you may have – 01482 328053.

**Aluminium Wood Primer**
Ideal for use on knotted or resinous timber to prevent staining. Also acts as a heavy duty wood primer.

**Acrylic Primer Sealer Undercoat**
A water based primer giving the benefit of being low odour and fast drying.
Ideal for plaster preparation or for any wood surface which requires priming. Also suitable for bricks and walls.
- Suitable for interior and exterior use
- Fast drying
- Provides a white finish which can be left or overcoated if required.

**Zinc Phosphate Primer**
A high performance metal primer for use on most metal surfaces including steel, iron and aluminium (if abraded or etched).

In addition, this primer can be used on wood/metal composite surfaces when combined in the same structure as it will prime both surfaces e.g. window frames made up of both materials.
- A high durability primer - ideal in coastal areas
- Dries to a matt finish
- Ideal for fire escapes, window frames, metal gates, metal garage doors, etc.

**Stain Block All Purpose**
A white, general purpose stain blocking primer made with low odour solvents.

This multi surface primer gives excellent coverage to a multitude of stains, ensuring it does not bleed through the finishing coat.
- Suitable for interior and exterior use
- Fast drying
- Can be overcoated with most top coats

**For Metals/Other Surfaces**

**Red Oxide Metal Primer**
A good general purpose, traditional metal primer for use on ferrous metallic surfaces. Has good anti-corrosive properties.

**Patent Knotting**
A low viscosity shellac based product for use on knotted or resinous areas of wood. This prevents the resin surfacing and marking paint film over the top.

Is compatible with various Coo-Var primers depending on substrate - if in doubt, speak to Coo-Var Technical Services.

Dries to a translucent brown gloss.

THE EFFECTIVE SOLUTION

**MDF Primer**
A water based white primer specially formulated for MDF surfaces such as furniture, doors, panels and frames etc.
- Touch dry in 30 minutes
- Provides a flat white finish ideal for overcoating with oil or water based top coats.

**All Metals Primer (Water based)**
Coo-Var All Metals Primer is fast drying and can be overcoated with a large range of top coats.

Will enhance the performance of Coo-Var Hammercore and is an ideal primer on all metal and galvanised surfaces.
- Suitable for interior and exterior use
- Fast drying
- Ideal for use on iron, steel, aluminium, brass, copper, galvanised surfaces, and many more.

**Water Based**

**All Purpose Primer**
A general purpose, water based primer. Is ideal on multi-surface substrates or when a ‘one solution’ product is required.
Suitable for use on plaster, metals and wood and some plastics (test a small area first).

The SIMPE EFFECTIVE Solution

NOTE: Always read the instructions as well as health & safety information before applying any coating.
