Health hazards

<b>CCOO-VAR</b> ® PAINTS, PRIMERS AND SPECIALISED COATINGS

### SAFETY DATA SHEET 138/W224 - GUARD-COAT BASE - CLEAR

SECTION 1: Identification of the	ne substance/mixture and of the company	y/undertaking
1.1. Product identifier		
Product name	138/W224 - GUARD-COAT BASE - CLEAR	
Product number	138/W224/C	
UFI	UFI: YVKP-M2UH-C00H-219Q	
1.2. Relevant identified uses o	f the substance or mixture and uses advi	ised against
Identified uses	BASE FOR TWO COMPONENT FLOC	DR COATING
1.3. Details of the supplier of the	he safety data sheet	
Supplier	COO-VAR Lockwood Street HULL UK HU2 0HN +441482328053 (T) +441482219266 (F) info@coo-var.co.uk	TEAL & MACKRILL EU B.V. Zandvoortstraat 69 1976 BN IJMUIDEN THE NETHERLANDS +441482328053 (T) +441482219266 (F) info@coo-var.co.uk
Contact person	Technical Department -, 08.30 - 16.30	hrs Mon - Thurs, 08.30 - 15.00 hrs Fri, as above
Manufacturer	TEAL & MACKRILL LIMITED LOCKWOOD STREET HULL HU2 0HN +44(0)1482 320194(T) +44(0)1482 219266(F) info@teamac.co.uk	
1.4. Emergency telephone number		
Emergency telephone	+44 (0) 1482 328053 Coo-Var (08.30 -	16.30 hrs Mon - Thurs, 08.30 - 15.00 hrs Fri)
SDS No.	11273	
SECTION 2: Hazards identification	ation	
2.1. Classification of the subst Classification (EC 1272/2008) Physical hazards	ance or mixture Not Classified	

Environmental hazards	Aquatic Acute 1 - H400 Aquatic Chronic 1 - H410

 Human health
 The product contains a small amount of sensitising substance. May cause skin sensitisation or allergic reactions in sensitive individuals.

Skin Irrit. 2 - H315 Eye Irrit. 2 - H319 Skin Sens. 1 - H317

Physicochemical When handled correctly, undamaged units represent no danger.

### 2.2. Label elements

# Hazard pictograms

Signal word	Warning
Hazard statements	H315 Causes skin irritation. H319 Causes serious eye irritation. H317 May cause an allergic skin reaction. H410 Very toxic to aquatic life with long lasting effects.
Precautionary statements	<ul> <li>P102 Keep out of reach of children.</li> <li>P101 If medical advice is needed, have product container or label at hand.</li> <li>P271 Use only outdoors or in a well-ventilated area.</li> <li>P273 Avoid release to the environment.</li> <li>P280 Wear protective gloves/ protective clothing/ eye protection/ face protection.</li> <li>P305+P351+P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.</li> <li>P337+P313 If eye irritation persists: Get medical advice/ attention.</li> <li>P303+P361+P353 IF ON SKIN (or hair): Take off immediately all contaminated clothing.</li> <li>Rinse skin with water or shower.</li> <li>P332+P313 If skin irritation occurs: Get medical advice/ attention.</li> <li>P501 Dispose of contents/ container in accordance with national regulations.</li> </ul>
Supplemental label information	Contains a biocidal product May produce an allergic reaction. EUH211 Warning! Hazardous respirable droplets may be formed when sprayed. Do not breathe spray or mist.
Contains	FORMALDEHYDE, OLIGOMERIC REACTION PRODUCTS WITH 1-CHLORO-2,3- EPOXYPROPANE AND PHENOL, OXIRANE, MONO [(C12-14- ALKYLOXY)METHYL] DERIVS
Supplementary precautionary statements	P261 Avoid breathing vapour/ spray. P370+P378 In case of fire: Use alcohol resistant foam, carbon dioxide or dry powder to extinguish. P403+P233 Store in a well-ventilated place. Keep container tightly closed.
0.0. Other hereads	

### 2.3. Other hazards

This product does not contain any substances classified as PBT or vPvB.

### SECTION 3: Composition/information on ingredients

### 3.2. Mixtures

FORMALDEHYDE, OLIGOMERIO WITH 1-CHLORO-2,3-EPOXYPR		10-30%
CAS number: 9003-36-5	EC number: 500-006-8	REACH registration number: 01- 2119454392-40-0003
Classification	Classificatio	on (67/548/EEC or 1999/45/EC)
Skin Irrit. 2 - H315	Xi;R38. N;F	R51/53. R43.
Skin Sens. 1 - H317

### 4.3. Indication of any immediate medical attention and special treatment needed

Notes for the doctor	No specific recommendations. If in doubt, get medical attention promptly.			
SECTION 5: Firefighting measures				
5.1. Extinguishing media				
Suitable extinguishing media	Non flammable at room temperature, but will burn. Use fire-extinguishing media suitable for the surrounding fire. Extinguish with the following media: Water spray, fog or mist. Foam, carbon dioxide or dry powder.			
5.2. Special hazards arising fro	5.2. Special hazards arising from the substance or mixture			
Specific hazards	Toxic gases or vapours.			
5.3. Advice for firefighters				
Protective actions during firefighting	Avoid breathing fire gases or vapours. Containers close to fire should be removed or cooled with water.			
Special protective equipment for firefighters	Wear positive-pressure self-contained breathing apparatus (SCBA) and appropriate protective clothing.			
SECTION 6: Accidental releas	e measures			
6.1. Personal precautions, prot	ective equipment and emergency procedures			
Personal precautions	Avoid inhalation of vapours and contact with skin and eyes. Provide adequate ventilation. Wear protective clothing as described in Section 8 of this safety data sheet.			
6.2. Environmental precautions	3			
Environmental precautions	Avoid discharge into drains or watercourses or onto the ground. Contain spillage with sand, earth or other suitable non-combustible material. Spillages or uncontrolled discharges into watercourses must be reported immediately to the Environmental Agency or other appropriate regulatory body.			
6.3. Methods and material for o	containment and cleaning up			
Methods for cleaning up	Avoid the spillage or runoff entering drains, sewers or watercourses. Absorb in vermiculite, dry sand or earth and place into containers. Collect and place in suitable waste disposal containers and seal securely. For waste disposal, see Section 13.			
6.4. Reference to other section	<u>s</u>			
Reference to other sections	For personal protection, see Section 8.			
SECTION 7: Handling and stor	age			
7.1. Precautions for safe hand	ing			
Usage precautions	Avoid inhalation of vapours. Avoid spilling, skin and eye contact. Do not eat, drink or smoke when using the product. Good personal hygiene procedures should be implemented. Wash hands and any other contaminated areas of the body with soap and water before leaving the work site. The Manual Handling Operations Regulations may apply to the handling of containers of this product. For products sold by weight refer to the guide net weight indicated on the container. Allowance will have to be made for the immediate packaging to give an approximate gross weight.			
7.2. Conditions for safe storage, including any incompatibilities				
Storage precautions	Store in tightly closed original container in a dry, cool and well-ventilated place. Store in			

7.3. Specific end use(s)

direct sunlight. Keep containers upright.

closed original container at temperatures between 5°C and 25°C. Protect from freezing and

Specific end use(s)The identified uses for this product are detailed in Section 1.2.Usage descriptionCollect and place in suitable waste disposal containers and seal securely. Label the<br/>containers containing waste and contaminated materials and remove from the area as soon<br/>as possible.

### SECTION 8: Exposure controls/Personal protection

#### 8.1. Control parameters

#### Occupational exposure limits

#### **Titanium Dioxide**

Long-term exposure limit (8-hour TWA): WEL 10 mg/m<sup>3</sup> inhalable dust Long-term exposure limit (8-hour TWA): WEL 4 mg/m<sup>3</sup> respirable dust WEL = Workplace Exposure Limit.

### FORMALDEHYDE, OLIGOMERIC REACTION PRODUCTS WITH 1-CHLORO-2,3-EPOXYPROPANE AND PHENOL (CAS: 9003-36-5)

DNEL	Workers - Inhalation; Long term systemic effects: 29.39 mg/kg Workers - Dermal; Long term systemic effects: 104.15 mg/kg/day General population - Inhalation; Long term systemic effects: 8.7 mg/kg General population - Dermal; Long term systemic effects: 62.5 mg/kg/day General population - Oral; Long term systemic effects: 6.25 mg/kg/day			
	Titanium Dioxide (CAS: 13463-67-7)

### 8.2. Exposure controls

Protective equipment

Appropriate engineering

Personal protection

controls

Provide adequate ventilation. Avoid inhalation of vapours. Observe any occupational exposure limits for the product or ingredients.

Unprotected persons should be kept away from treated areas.

Eye/face protection Eyewea

Eyewear complying with an approved standard should be worn if a risk assessment indicates eye contact is possible. The following protection should be worn: Chemical splash goggles.

Hand protection	To protect hands from chemicals, gloves should comply with European Standards EN388 and 374. As a general principle, exposure should be managed by means other than the provision of protective gloves. Manufacturers' performance data suggest that the optimum glove for use should be: Butyl rubber. Thickness: > 0.5 mm Permeation breakthrough time according to EN374 - class: (1-6) e.g. minimum 480 mins. or Nitrile rubber. Thickness: > 0.4 mm Permeation breakthrough time according to EN374 - class: (1-6) e.g. minimum 480 mins. or Nitrile rubber. Thickness: > 0.4 mm Permeation breakthrough time according to EN374 - class: (1-6) e.g. minimum 240 mins. Caution: The performance of gloves under actual working conditions can be significantly affected by many factors and the information provided according to EN374 may not accord with what is achieved in practice. We recommend that expert professional advice is sought that takes into account of the work processes and working environment applicable for each task where gloves are to be worn.
Other skin and body protection	Wear appropriate clothing to prevent reasonably probable skin contact.
Hygiene measures	Use engineering controls to reduce air contamination to permissible exposure level. No specific hygiene procedures recommended but good personal hygiene practices should always be observed when working with chemical products.
Respiratory protection	No specific recommendations. Respiratory protection may be required if excessive airborne contamination occurs.

### SECTION 9: Physical and chemical properties

9.1. Information on basic physical and chemical properties		
Appearance	Clear, yellowish liquid.	
Colour	Grey.	
Odour	Sweetish.	
Odour threshold	Not determined.	
рН	Technically not feasible.	
Melting point	Not determined.	
Initial boiling point and range	>150°C @ 760 mm Hg	
Flash point	28 (approx.)°C Closed cup.	
Evaporation rate	Not determined.	
Evaporation factor	Not determined.	
Upper/lower flammability or explosive limits	: 0.8	
Other flammability	Not determined.	
Vapour pressure	<0.1 mbar @ °C	
Vapour density	heavier than air	
Relative density	1.12 @ @ 25C°C	
Solubility(ies)	Immiscible with water	
Partition coefficient	Not determined.	
Auto-ignition temperature	>200°C	
Decomposition Temperature	Not determined.	
Viscosity	0.90 Pas @ 25 C°C	

Explosive properties	Not determined.	
Explosive under the influence of a flame	Not considered to be explosive.	
Oxidising properties	Not determined.	
9.2. Other information		
Volatile organic compound	EU: (cat A/j): 140 g/l 2010. This product contains a maximum VOC content of <1 g/litre.	
SECTION 10: Stability and rea	activity	
10.1. Reactivity		
Reactivity	There are no known reactivity hazards associated with this product.	
10.2. Chemical stability		
Stability	Stable at normal ambient temperatures and when used as recommended.	
10.3. Possibility of hazardous	reactions	
Possibility of hazardous reactions	Will not occur	
10.4. Conditions to avoid		
Conditions to avoid	Not known.	
10.5. Incompatible materials		
Materials to avoid	Strong acids. Alkalis - inorganic. Amines. Mercaptans (thiols).	
10.6. Hazardous decomposition products		
	n products	
Hazardous decomposition products	Oxides of carbon. Thermal decomposition or combustion may liberate carbon oxides and other toxic gases or vapours.	
Hazardous decomposition	Oxides of carbon. Thermal decomposition or combustion may liberate carbon oxides and other toxic gases or vapours.	
Hazardous decomposition products	Oxides of carbon. Thermal decomposition or combustion may liberate carbon oxides and other toxic gases or vapours.	
Hazardous decomposition products SECTION 11: Toxicological int	Oxides of carbon. Thermal decomposition or combustion may liberate carbon oxides and other toxic gases or vapours.

Bioaccumulative potential No data available on bioaccumulation.

Partition coefficient	Not determined.
12.4. Mobility in soil	
Mobility	The product is non-volatile.
12.5. Results of PBT and vPvB assessment	
Results of PBT and vPvB assessment	This product does not contain any substances classified as PBT or vPvB.
12.6. Other adverse effects	
Other adverse effects	Not determined.
SECTION 13: Disposal considerations	
13.1. Waste treatment methods	
General information	Avoid the spillage or runoff entering drains, sewers or watercourses. Waste should be treated as controlled waste. Dispose of waste to licensed waste disposal site in accordance with the requirements of the local Waste Disposal Authority. When handling waste, the safety precautions applying to handling of the product should be considered. DO NOT reuse containers containing residual product without commercial cleaning
Waste class	When this material, in its liquid state, as supplied, becomes a waste, it is categorised as a hazardous waste, with code 08 01 11* (EPOXY BASED LIQUID WASTE). Part-used containers, not drained and/or rigorously scraped out and containing residues of the supplied material, are categorised as hazardous waste, with code 08 01 11* (EPOXY BASED LIQUID WASTE). Ideally this component should be mixed with the appropriate hardener and allowed to react fully to produce a solid waste. Neutralised empty packages, are categorised as non-
	hazardous waste, with code 15 01 02(plastic packaging) or 15 01 04 (metal packaging)
