

# Case Study:

## Milton Keynes Under pass Saxonville

**Project: Milton Keynes underpass, Saxon Ville**

**Problem: The tunnel was frequently being targeted for graffiti with spray paints**

**Product used: GP101 – Anti Graffiti Protective Clear**

**Product Function: It's primary function is to provide protection from paint , fly posting and marker pens on surfaces that would subsequently be removed with water.**

**Surfaces: These surfaces are typically concrete, brick or stone.**

**Project Completed: In 2012 & Still going strong.**
