controls

No specific ventilation requirements. This product must not be handled in a confined space without adequate ventilation.

Eyewear complying with an approved standard should be worn if a risk assessment indicates eye contact is possible. Unless the assessment indicates a higher degree of protection is required, the following protection should be worn: Tight-fitting safety glasses.

Chemical-resistant, impervious gloves complying with an approved standard should be worn if a risk assessment indicates skin contact is possible. The most suitable glove should be chosen in consultation with the glove supplier/manufacturer, who can provide information about the breakthrough time of the glove material. It is recommended that gloves are made of the following material: Nitrile rubber. Barrier cream applied before work may make it easier to clean the skin after exposure, but does not prevent absorption through the skin.

Other skin and body Wear suitable protective clothing as protection against splashing or contamination.

Hygiene measures No specific hygiene procedures recommended but good personal hygiene practices should always be observed when working with chemical products.

Respiratory protection

No specific recommendations. Respiratory protection may be required if excessive airborne contamination occurs.

Waste class

When this material, in its liquid state, as supplied, becomes a waste, it is categorised as hazardous waste, with EWC code: 08 05 01 (WASTE ISOCYANANTES). Part-used containers, and not drained and/or rigorously scraped out containers, are categorised as hazardous waste, with EWC code 08 05 01 (WASTE ISOCYANATES). Ideally this component should be mixed with the appropriate resin base and allowed to react fully producing a solid non hazardous waste. Transfering some, ready to use, mixed Base/Activator to the Activator package and mixing again should ensure that any Activator residue will fully react and harden. The drained and rigorously scraped out container can then be catagorised as non-hazardous waste with code 15 01 02(plastic packaging) or 15 01 04 (metal packaging). If mixed with other wastes, the above waste code may not be applicable.
